Why I choose graphic and Ui/Ux ?

Sweta Patel

What is graphic and Ui/Ux design

Graphic design:

- Graphic design is Visual communication.

Ui/Ux design:

- Ui is how to website or app look.
- Ux is how the app or website work and feel for the user.

Graphic and Ui/Ux design past/present/future

Graphic design

- **Past:** Made posters, ads, and books by hand or print.
- **Present:** Uses computers to design for social media, websites, and brands.
- **Future:** Will design for new tech like virtual reality and use smart tools like AI.

Ui/Ux design

- **Past:** not a clear job; website were simple and basic.
- **Present:** design how apps and website looks and how they work.
- **Future:** will create smart,3d and voice based design for new design.

Why choose graphic and Ui/Ux design

- "I chose graphic and UI/UX design because I've always loved being creative and visually expressing ideas. I enjoy solving problems and making things that not only look good but are easy to use. Design gives me the chance to blend creativity with technology, and I'm excited to keep learning tools like Figma, Photoshop, and more to improve my skills."

Future or growth graphic and Ui/Ux designers

Graphic Designer

- **Future:** Will design for videos, 3D, and smart tools like AI.
- **Growth:** Still needed for social media, ads, logos, and branding.

UI/UX Designer

- **Future:** Will design for apps, websites, smart devices, and virtual reality.
- **Growth:** High demand because everyone wants easy-to-use apps and websites.
